

Drums, Barrels & Batch Cans

Drums, Barrels & Batch Cans

All drums are molded of 100% virgin polyethylene and meet, or exceed USDA and FDA requirements. Our straight sided drums maintain the same diameter at the bottom of the drum as at the top. Our nestable drums are narrower at the bottom and have molded-in stops for easy separation of stacks. The standard wall thickness is 0.180", but any drum can be molded to 0.120 or 0.240" upon request. Both nestable and straight sided drums can be customized with available options including dust covers, dollies, and lever lock lids with tamper evident rings.

Batch cans are available in the same sizes as our drums and come in a full 1/4 inch wall thickness. This added thickness allows for heavy duty stainless steel handles to be molded into the 100% virgin polyethylene wall. This process yields an easy to clean seamless interior that, like our drums, meets or exceeds USDA and FDA requirements. Batch Cans are available with optional dust covers or dollies.

Straight Sided Drums

Item	Dia. x Ht. in inches	Capacity in Gallons	Shipping- Weight lbs
180-7S *	13 x 16	7	3
180-18S *	16 x 26	18	9
180-20S	19 x 23	20	10
180-30S	19 x 28	30	12
180-35S	20 x 33	35	14
180-40S	22 x 31	40	16

180-55N	24 x 39	55	20
180-60N *	25 x 39	60	20

240-50N Gripper Drum

This nestable drum has a patented lip design with molded in grips and nesting stops for easy separation of stacks. While it was originally designed for handling meat, it is widely used in various industries. The Gripper is available with an optional dust cover.

Our drums, like all of our products, are available in a wide selection of standard colors.

* These drums are not available with Lever Lock Lids & Rings
