

Auto Rabbit Chucker

The new Rabbit Chucker now has a 200 capacity turret magazine. This machine allows quick adjustment for throwing targets from rolling rabbits to vertical teal. Another simple adjustment allows for less expensive standard 108mm targets to be thrown for chandelle and springing teal presentations. The entire system is rugged and water-resistant. The ten-inch wheels provide easy mobility on rough terrain. A quick-adjust jack and tilt adjustment are included for easy leveling on uneven terrain. The Rabbit Chucker uses many of the same high-quality parts as our other 12-volt machines.
